Why Give Blood?

- ❖ By donating just one unit of blood, you have a chance to save 3-5 lives.
- ❖ Blood cannot be manufactured. It can only come as a gift from people.
- ❖ You burn about 750 calories by donating one unit of blood.
- ❖ Donation keeps donor's body healthy.
- ❖ It's something you can spare — most people have blood to spare... yet, there is still not enough to go around.
- ❖ You will be helping to ensure that blood is there when you or someone close to you may need it. Most people don't think they'll ever need blood, but many do.
- ❖ Blood is something money can't buy. Only something one person can give to another.
- ❖ You will be someone's hero — you may give a newborn, a child, a mother or a father, a brother, or a sister another chance at life.
